

# **APOLLO REACH HOSPITALS, KARIMNAGAR BAND WIRED**

**FROM : MY STORY -JAHANGEER JAMALPUR (Patient)**

**GOOD MORNING TO ALL.**

I am 60-year-old man and leading a fairly comfortable life, I slipped and fell and sustained injury to my right knee. I had intense pain and was unable to weight bear. I immediately approached to Dr. Iftekar Ali Consultant Orthopaedic Surgeon in Apollo Reach Hospital, he took an x-ray and diagnosed as fracture right Patella (knee cap).

I am a patient of diabetes and was very scared and apprehensive about the outcome. Dr. Iftekar Ali comforted me and my whole family and did a surgery called “Tension band wiring”. I must confess to a certain mirth when I first heard and dressing done on 27/05/2022, the pain was controlled with medication and I was looked after so very well.

I am going to miss these nurses and support staff, when I get home wound and fracture are healing well. When the bone has recovered and healed, the wire will be removed. I trust the God, Almighty will continue blesses me with excellent healing.

I thankful to Dr. Iftekar Ali, Nursing Staff, Physiotherapist and all the supportive staff.

Thanking you
